

WHAT IS THE FAR INFRARED

Photo left without Far Infrared blanket - Photo right with Far Infrared blanket

Wave Length Range

Near Infrared Ray: 0.76~1.5um

Mid. Infrared Ray: 1.5~5.6um

Far Infrared Ray: 5.6~1000um

FAR infrared heat waves benefit our body by:

Dilating blood vessels/capillaries, providing increased flow of rich oxygenated blood to muscles & joints

Reduce muscle spasms and promoting healing injured or sore muscle fibers

Improving flow of lymph system to reduce swelling and inflammation

Raise white blood cell count – greater
